    github = 'https://github.com/joevbruno'  
  } = profile  
  
  return profile  
}
```

Let's Chat.

Seeking a unique, senior level position, which combines Offensive Security, Product Development, and Design to make the world safer.

Hello World

Joe Bruno is an Offensive Security Consultant, Senior Software Architect, and Bug Bounty Hunter with nearly a decade of IT experience within a variety of domains, including IT Governance, Software Development, PHP Malware Research, and Application Security.

He holds a number of certifications, including the Offensive Security Certified Professional (OSCP), and has considerable experience attacking, defending, and building modern, award-winning applications for non-profits, government contractors, and startups, particularly within the Martech, Fintech, and InfoSec business sector.
